Prepared by: Louann Waldner

What are the strengths of your area?:
1) Curriculum is now established through the program.
   2) An adjunct committed to working with the program is available.
   3) Grant funding has allowed the program to build.
   4) Equipped shop that is necessary to build the program.

What improvements are needed?:
1) Recruitment and Enrollment
   2) Industry Advisory
   3) Permanency of facility at TCOVE.

Describe any external opportunities or challenges:
Facility will be an issue as the TCOVE facility is sold to TJUHS.
Industry is supportive but are not hiring straight machinists in the quantities that were anticipated.

Overall Outcome Achievement: Students are getting the basics problems of machining processes through the MANU 210. The observation is that students move through the learning outcomes at varying paces.

Changes based on outcome: The observation that students move through the learning outcomes and varying paces. Thus, there is some recognition of changing the laboratories to make certain achievement: all students are getting both challenge and support.

No Actions were returned for this Unit based upon the selected parameters.
