Transformation

The change from a state of being to another. To transform something different from its original state.

Concept: The transformation of water from liquid to solid. More specifically, water that has transformed to ice. Ice is one of the most common substances on the planet. We depend on it for survival and it exists in the three basic forms of water: gas, liquid, and solid. It transforms constantly moving through our environment and our bodies in a perpetual cycle.
Transformation:
To change, from one state of being to another. To become something different from the original, shape shift.

Concept: the transformation of water from liquid form to solid. More specifically: water that has transformed to become snowflakes and ice. Water is one of the most unique substances on the planet. We depend on it for survival and it exists in the three basic forms of matter: gas, liquid and solid. It transforms, constantly moving through our environment and our bodies in a perpetual cycle.
WATER DROPS (1% CUBES)

2ND LEVEL - WATER EXPANDS AS IT RISES. VOID SPACE TO REPRESENT WATER VAPOR (ANGLES)

SUPPORT WALLS
STYLED SNOWFLAKES
DEFINE EXPANDED CUBE SPACE CREATING CORRIDORS OR HALLS FOR AIR FLOW (BARS, PANELS)

ENTRY HALL
