Project 4: Martial Arts Dojo

JEET KUNE DO

Concept Diagram

The style of Jeet Kune Do demanded a greater use of fluidity, speed, and technique. This technique is for combat, not in competition. It is a style without a style, without restrictions, and always changing. The concept behind the building is that of Bruce Lee's concept of "Jeet Kune Do artistry". It is a fluid, flowing, creative space that is designed for deep movement and in the spirit true to the concept of Jeet Kune Do. The building is forming around its own central axis.
