When it comes to the debate on the origin of the universe, there are two main sides. Science dictates that the universe came to be from an expansion of a single small piece of matter. Religion (specifically Christianity) tells us that the universe was created by God. These two opposite sides of the debate present an ever-living dialog.
PARTI DIAGRAM

- Universe (rods, cubes, panel)
- Expansion of matter (rods)
- Separation of two opposite ideas (panels)
- God (cubes, rods)
- God creating universe (rod)
