INTRODUCTION

The *College of the Sequoias Resource Allocation Manual* provides a detailed description of the process used by the College of the Sequoias Community College District (hereafter referred to as the District) to allocate resources.

This manual describes the following components of the District’s resource allocation processes:

- Sources of revenue;
- Categories of expenditures;
- Base budget development process;
- Above-base resource allocation process;
- Links between resource allocations and planning;
- Processes for assessing the effectiveness of resource allocations;
- Evaluation of resource allocation processes;
- Purpose and membership of the Budget Committee;
- A reference list of Board Policies and Administrative Policies pertaining to budget development and resource allocations.

This manual has been written and posted on the District’s internet in order to make the District’s resource allocation processes available to all campus District constituencies. In addition, the Vice President of Administrative Services will schedule an annual budget forum during the spring budget development period to communicate the District’s anticipated budget for the ensuing year. This budget forum will be made available to all District constituencies. Since this step will be repeated each year, the information presented to campus District constituencies will also detail any changes made to the resource allocation processes that occur as a result of the Budget Committee’s evaluations and assessments of resource allocation processes described in this manual.

In addition to the description of the District’s resource allocation model provided in this manual, a general overview of the resource allocation model is included in the *College of the Sequoias Integrated Planning Manual.*
Sources of Revenue

Unrestricted General Funds
By far the majority of the District’s revenue is from state apportionment.

State apportionment is calculated based on the amount of earned Full Time Equivalent Students (FTES). An FTES is the equivalent of one student taking 30 units a year (15 units a semester). An FTES is calculated using the number of lecture units x 17.5 weekly student contact hours (WSCH) per unit x number of students = total WSCH for the class. 525 WSCH = 1 FTES.

The state sends the calculated amount of revenue directly to the District minus two other state allocations and two amounts that are collected locally:

- Education Protection Act allocation – Proposition 30 state funding
- Redevelopment Agency allocation – which is considered a “backfill” amount for state funding
- Property taxes collected by the county and proportionately distributed by the county to the District and
- Student enrollment fees collected by the District.

The second category of District revenue, miscellaneous income, constitutes on average 7% of the revenue of the adopted budget. This income is allocated to the District from approximately 65 different fund sources. The largest of these smaller fund sources are as follows.

<table>
<thead>
<tr>
<th>Source of Funds</th>

</tr>
<tr>
<td>Facilities rental</td>
<td>0.324%</td>
</tr>
<tr>
<td>Library GoPrints</td>
<td>0.141%</td>
</tr>
</tbody>
</table>

Restricted Funds
Some revenue received by the District is allocated based on specific guidelines and the use of those funds is limited by state or federal guidelines. For example, the amount of EOPS funds allocated to a district is contingent on the number of enrolled students who match specific demographic characteristics. The three categories of restricted funds are identified on the following page.
Other Funds
The District receives a small portion of its revenue from self-supporting programs, such as contract education; enterprise accounts, such as the bookstore and foodservices; and fees collected by the Student Senate or the gate receipts of theatre, music, and athletic events.

Expenditures

From Unrestricted General Funds
Unrestricted general funds are allocated to pay for costs related to fulfilling the District mission.

There are three categories of expenditures that are paid from the unrestricted general fund:

1. Non-discretionary base: These are the District’s most basic required costs. The largest amount of the unrestricted general fund adopted budget, typically in excess of 82.3%, is for salary and benefits of the District’s permanent employees as governed by the Master Agreements.

2. Discretionary base: These are also basic costs within the District. Although still part of the District’s base budget, there is more flexibility in the amounts budgeted in each of these categories.

3. Above-base funding: Each year the Board of Trustees, through annual budget adoption, establishes an amount of funding to pay for expenses emanating from the District’s Master Plan, Strategic Plan, and Program Reviews. It is through this mechanism that the District provides fiscal support for its planning and program review processes.

From Restricted Funds
Restricted funds are expended only for the purposes outlined in the corresponding federal or state law, code, or regulation. These funds are distributed to the appropriate Service Area and all expenditures from these funds are monitored by Fiscal Services to ensure that those expenditures comply with the federal or state law, code, or regulation.

From Other Funds
Revenue from funds in this category may be expended for costs related to fulfilling the District mission. The revenue may remain in the budget of the District entity that generated the funds, for example, proceeds from materials fees remain with the instructional unit that imposed the fees. A second option is that all or a portion of the revenue may be allocated to a unit other than the entity that generated the funds. For example, each year a Co-curricular Fund is established by combining fees collected by the Student Senate auxiliary resources when available. The Co-curricular Fund is allocated based on proposals that may be submitted by any unit within the District, such as a request from an athletic team for new sports equipment or uniforms.

Base Budget Development Process

The District relies on the following major principles to guide the budget development process:

1. Balance ongoing expenditures with ongoing revenues,
2. Maintain a minimum 6% reserve for economic uncertainties (board priority is typically higher), and
3. Fund all expenditures in the non-discretionary base, such as contractual obligations.

Funding for the reserve and the non-discretionary base are included in the District budget as “off the top” costs and are not available to be allocated to one of the District’s four Service Areas:

1. Academic Services
2. Administrative Services
3. Student Services
4. Superintendent/President’s Office

As noted on the “Timeline and Process for Base Budget Development,” the budget development process begins in January. In its allocation of resources to the four Service Areas, the District uses an incremental approach to the budget development process.

- Step 1: The basic allocation for each Service Area is based on that Service Area’s prior year budget.

- Step 2: Carry-over funds from the prior year are generally not added to the basic allocation. Carryover may be approved in certain circumstances if a detailed request is submitted by the requesting department or unit to their respective Service Area administrator by May 15th, and if the request details a specific planned expenditure that is necessary and links to District Objectives. The request will be reviewed by Senior Management Council and/or the Vice President of Administrative Services for approval.

- Step 3: This basic allocation may also be adjusted based on a projection of how much FTES the District anticipates earning in the coming year based in part on the District’s workload capacity set by the state.

- Step 4: This basic allocation may also be adjusted based on decisions about (1) requests from Service Areas for base budget augmentations and/or (2) staffing requests. Administrative Procedures 3261, 3262 and 3263 outline the process for granting base budget augmentations and new or replacement faculty positions. The Senior Management Team determines the process for granting new or replacement classified and administrative positions and any base budget augmentation.
Adjustments may continue to be made to Service Area budgets throughout the spring and summer as new information is available from state. The final budget is presented to the Board of Trustees for adoption in September of each year.

</tbody>
</table>
Above-Base Resource Allocation Process

The Board of Trustees, through annual budget adoption, determines the amount of Above-Base Funds available for a fiscal year. Above-Base Funds are divided into four categories:

1. Instructional equipment
2. Non-instructional equipment
3. Facilities
4. Technology

The process for allocating Above-Base Funds is described below and summarized in the chart that follows the description.

Ongoing funding needs cannot be requested through the Above-Base Resource allocation process. If a particular request requires additional annual funding, the mechanism of meeting that ongoing funding requirement must be defined in the unit’s program review.

Above-Base funding requests must be $500 minimum. Requests below that dollar value should be met through the department or Service Area budgets.

Definitions of Above-base Categories:

**Instructional Equipment:**
Equipment purchased for instructional and/or library/learning resource center activities involving presentations and/or hands-on experience to enhance student learning and skills development.

"Equipment" shall mean tangible District property (excluding land and/or buildings and improvements thereon and licensed motor vehicles) of a more or less permanent nature that cannot be easily lost, stolen or destroyed; but which replaces, modernizes or expands an existing instructional program. Classroom furniture is included.

"Library Materials" shall mean books, periodicals, related ordering, processing, cataloging or binding costs or services, reference databases, cataloging and/or security systems, maps, documents, microforms, or prerecorded audio-visual resources for the benefit of student learning.
Examples: Books, library materials, classroom desks, classroom chairs, industrial technology equipment; machines and equipment used in instruction, such as cook-tops and gas ranges, sewing machines, welding machines, drafting printers, lab equipment, maps, and models.

Non-Instructional Equipment:
Equipment purchased to aid or enhance staff work or office spaces that is not used for instructional or resource center purposes. "Equipment" shall mean tangible District property (excluding land and/or buildings and improvements thereon) of a more or less permanent nature that cannot be easily lost, stolen or destroyed.

Examples: Vehicles used to transport students or staff. Trailers used to transport any equipment. Gators, mowers and golf carts. Equipment and tools used for maintenance, operations, custodial or grounds purposes. Office equipment, shelves and furniture, signage. Equipment and machinery not used for instructional purposes such as fax machines, calculators, and shredders.

Facilities:
Any facility improvement or renovations with a life of over one year; land and/or building improvements

Examples: Storage sheds, improvements to curbing or walkways, adding room dividers or changing room layouts, carpeting, painting, window coverings, shelving or equipment storage that is built in (attached to the structure), shade structures, athletic equipment of a permanent nature (pool springboard or cover, bleachers, etc.).

Technology (note: Technology can be either instructional equipment [for state funding purposes], or non-instructional):
Technology is software, hardware, and infrastructure that either directly or indirectly affect instruction, learning outcomes, and services within the College of the Sequoias campus community. For purposes of Above-based funding, any request that reasonably fits into the above definition will be considered “technology”.

Examples: Software, hardware or directly attached peripheral equipment. Audio visual equipment needed for the support of smart classrooms. Computers, laptops, wireless infrastructure or wireless modems. Printers, phone systems, microphones, smart boards. Ceiling/wall projectors, video streaming and recording equipment.

Step 1
Requests for Above-Base Funds may be generated in one of two ways:

- Units may request Above-Base Funds through Program Review (Step 1A) or Units designated as a responsible party for a District Objective may request resources if funding is needed for the achievement of that District Objective (Step 1B).
Step 2
Divisions review the requests for Above-Base Funds in the program reviews and collaborate with faculty and staff to identify funds within the department, program, or division to fulfill the request. Any funding requests that cannot be fulfilled at the unit level are prioritized at the division level. A prioritized list is created for each of four categories (Instructional equipment, Non-instructional equipment, Facilities, and Technology) and these are forwarded to the appropriate Service Area manager (Vice President of Academic Services, Administrative Services, or Student Services, or the Superintendent/President).

Step 3
Service Area managers lead a review of the division’s prioritized lists of requests for Above-Base Funds and collaborate with managers, faculty and staff to identify funds within the department, program, or division to fulfill the request. All remaining funding requests are prioritized at the Service Area level. The four Service Areas submit one prioritized list per Service Area (list includes Instructional Equipment, Non-instructional Equipment, Facilities, and Technology) which is forwarded to the Budget Committee. Each Service Area prioritized list will reflect the item description and amount as described in program review; resource requests should not be split up into multiple requests.

Step 4
The Budget Committee receives the four lists of Service Area prioritized resource requests and forwards the technology requests to the Technology Committee and the facilities requests to the Dean of Facilities, and to the Facilities/Safety Council where applicable. These committees review the funding requests and conduct technical and feasibility assessments, consolidating requests.
where possible. If a resource request is deemed not feasible, the Budget Committee and the requesting party will be notified.

**STEP 4**
The Budget Committee requests technical and feasibility assessments of requests for technology and facilities.

**Step 5**
With consideration of the Service Areas’ prioritized lists and the Technology Committee’s and Facilities Council’s technical and feasibility assessments, the Budget Committee prepares four final lists of institutional priorities using the Resource Request Rubric included in this document. This rubric weights the resource requests in each of the four categories based on the extent to which they are justified by:

- Program Review and alignment with District Objectives;
- Measurable course, program, or department outcomes;
- Breadth of impact; Connection to achieving the action;
- Potential impact on student success;
- Documentation and data supporting the rationale for the action and the need for the resource request; Measurable outcomes; and
- Rank on the Service Area prioritized lists.

At its discretion, the Budget committee may give priority to requests that reflect an external mandate or will correct a documented safety hazard. The Budget Committee finalizes the lists of institutional priorities and forwards the information to the District Governance Senate.

**STEP 5**
Budget Committee uses a rubric to prioritize the Above-Base resource requests and forwards the prioritized list to District Governance Senate.

**Step 6**
The District Governance Senate reviews and discusses the list of institutional priorities and identifies items that should or could be funded through the available resources, such as grants, COS Foundation, and other partnerships. The District Governance Senate then prioritizes the four lists for Above-Base Funds and recommends these priorities to the Superintendent/President.

**STEP 6**
District Governance Senate reviews the prioritized list and makes recommendation to Superintendent/President.
Step 7
The Superintendent/President reviews the list of institutional priorities for Above-Base Funds recommended by the District Governance Senate with Senior Management. Following this dialogue, the Superintendent/President prepares the final list of institutional priorities as a report to the Board of Trustees. The report to the Board of Trustees includes an explanation of how the items on the prioritized list are justified based upon the links to Program Review or links to a District Objective.

Through this process, the Above-Base Resource Allocation Process links financial planning to the District mission and integrates resource allocation with other processes in the District’s cycle of integrated planning. When the process is completed, Administrative Services will create the budgets for the approved Above-base Funds, and the Vice Presidents and Superintendent/President (Service Area Managers) will oversee the expenditures of the budgets. Vice President of Administrative Services will notify Above-base applicants who are not granted Above-base allocations in a timely manner, in order for applicants to submit other funding requests that may be available.
Above-Base Resource Allocation Process

**STEP 1A**
Units evaluate their existing on-going budgets as well as request Above-Base resources through Institutional Program Review.

**STEP 1B**
Parties responsible for implementing a District Objective may request Above-Base resources if needed to accomplish the District Objective.

**STEP 2**
Divisions review funding requests, identify funds if possible, prioritize funding requests, and forward priorities to Service Area manager.

**STEP 3**
Above-Base resource requests are prioritized within the Service Area. Those prioritized lists are sent to the Budget Committee for District-wide prioritization.

**Instructional Council**

**Student Services Council**

**Administrative Services**

**President’s Office**

**STEP 4**
The Budget Committee requests technical and feasibility assessments of requests for technology and facilities.

**STEP 5**
The Budget Committee uses a rubric to prioritize the Above-Base resource requests and forwards the prioritized list to District Governance Senate.

**STEP 6**
District Governance Senate reviews the prioritized list and makes recommendation to Superintendent/President.

**STEP 7**
Superintendent/President reviews the prioritized list, prepares the final recommendation for Above-Base resources, and presents the final report to the Board of Trustees.

By October 31st
By November 30th
By January 15th
By February 15th
By March 15th

Links between Resource Allocations and Planning

In the District’s cycle of integrated planning, resources are allocated based on rationales that tie the request to either a Program Review or to District Objectives. Funding requests in Program Reviews are required to be related to the measurement of a student learning outcome, a service area outcome, or to a District Objective. The District Objectives in the Strategic Plan are derived from the District Goals, which in turn are based on the District mission.

The three processes that link resource allocations to Program Review and District Objectives are:

1. Development of Budget Assumptions
   The budget development process reinforces the link between institutional planning and resource allocations through the budget assumptions. In early spring, the Fiscal Services and the Budget Committee drafts budget assumptions, reviews those draft assumptions with District Governance Senate, and modifies the assumptions as needed throughout the spring so that these reflect District Objectives as well as the impact of external decisions, such as the level of state apportionment.

2. Evaluation of Discretionary Base Budget Requests Shifts
   During the budget development process a unit may elect to re-allocate funds from one budget category to another within the unit’s discretionary base budget. The unit area manager request will include a justification based on how this budget shift will support the unit’s ability to address an issue identified in its Program Review and/or contribute to achievement of a District Objective. The unit area manager will contact fiscal services administration to implement the movement of funds.

3. Evaluation of Ongoing Discretionary Base Budget Requests and Staffing Requests
   Requests for additional staffing are generated in program review and are linked to a learning outcome, a service area outcome, a District Objective or the Strategic Plan. Requests for ongoing discretionary base budget funds are generated according to Administrative Procedure 3261, and links to outcomes and objectives are assessed by respective Service Area Administrator when prioritizing the requests for Senior Management Council review. All requests include a justification based on how this resource will support the unit’s ability to accomplish an action in its program review or contribute to achievement of a District Objective.

2-A. Evaluation of Above-Base Funding Requests
   Requests for Above-Base Funds may be justified by an issue identified in a Program Review or as necessary for the achievement of a District Objective. These justifications are considered at all levels in the process of prioritizing requests for Above-Base Funds and are included in the final prioritization for funding recommendation presented to the Board of Trustees.
Effectiveness of Resource Allocations

To meet the Accreditation Standard I.B.9., the District institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources. The District systematically assesses the effective use of financial resources and uses the results of the evaluation as a basis for improvement. This evaluation and assessment is multi-faceted and includes three processes.

1. **Report on Impact of Prior Year Above-Base Funding**
   The effectiveness of prior year’s resource allocation of Above-Base Funds will be documented, citing how the resources improved their unit’s effectiveness in serving students or moved the District toward achieving a District Objective. The Budget Committee monitors and reviews these justifications. Above-Base Funding, through program review, to ensure that this reporting is included in the District’s annual cycle of tracking the effective use of resources to improve institutional effectiveness.

2. **Annual Report on the Master Plan**
   This annual report:
   - Summarizes progress on District Objectives,
   - Analyzes whether that progress was effective in moving the District toward achievement of District Goals, and
   - Identifies the District Objectives that will be the basis for resource allocations in the coming year.

   In these ways, this document is, in essence, a report on the District’s effective use of its resources.

3. **Program Review**
   As part of Program Review, the assessments of student learning outcomes and service area outcomes are annually assessed, documented in the District’s software management system, and are evaluated as part of the subsequent year’s Program Review. Since the measurement of these outcomes reflects how the District expends its human and fiscal resources, improvements in these outcomes demonstrate the District’s effective use of its resources.
Evaluation of Resource Allocation Processes

The District uses two processes to comply with Accreditation Standard I.B.9. in the effectiveness of ongoing planning and resource allocation processes.

1. **Annual Process Review by Budget Committee**
   
   By May of each year, the Budget Committee evaluates the resource allocation and budgeting processes and prepares a report for the District Governance Senate. This assessment is based on feedback from those participating in resource allocation requests, the Budget committee themselves as well as the committee members’ reflections. The results of this annual process review may be the basis for improving the processes for the subsequent year. The Vice President of Administrative Services will present any resulting significant changes to the processes during the annual budget forum presented to all District constituencies.
Budget Committee

The function of the Budget Committee is to make recommendations regarding policies, planning, and other matters related to the District’s fiscal resources. The co-chairs forward recommendations from this governance group to the District Governance Senate. After consideration of input from the District Governance Senate, and other recommendations, the Superintendent/President makes the final recommendations that are either implemented or submitted to the Board of Trustees for approval.

Purpose

- Make recommendations to District Governance Senate on policies, planning and other matters related to fiscal resources
- Review and revise budget assumptions that guide budget development
- Monitor the District’s fiscal solvency
- Review the draft budget in its developmental stages
- Oversee, evaluate and assess the budget development process including making recommendations for Above-Base Funds and the District’s Faculty Obligation Number
- Provide budget analysis to the District Governance Senate
- Develop and maintain a process for ensuring that resource allocations are linked to District planning
- Annually monitor summary reports (resource allocation updates) showing how prior year’s Above-Base Funds improved units’ effectiveness in serving students or moved the District toward achieving a District Objective
- Review and discuss implementation of policies related to fiscal resources
- Serve as a forum for dialogue on ongoing fiscal activities, such as monthly and quarterly reports
- Review and share information on the state budget
- Conduct annual assessment of its own processes

Membership

- Administrative co-chair appointed by Superintendent/President or his designee
- Faculty or staff co-chair elected from among members
- Vice-President of Administrative Services
- Three administrators appointed by the Superintendent/President or his/her designee
- Four full-time faculty appointed by Academic Senate
- One adjunct faculty appointed by the adjunct faculty
- Two classified employees appointed by the classified employees
- One confidential employee appointed by the Superintendent/President or his/her designee
- Two student representatives appointed by the Student Senate
- Non-voting member: Fiscal Services Director/Officer or designee
