tuition-free, hands-on

"I can make a huge difference by helping farmers to save water."

—Victor, student

"I will be able to find well paid work where I already live."

—Konner, student

"Using data to improve crop production made me interested in this field."

—Kyler, student

The College of the Sequoias (COS) Ag Irrigation Academy certification will launch your career

- Build your resume with an internship, up to 225 hrs.
- Attend tuition-free*, hands-on classes two days/week at the Tulare campus starting in August
- No prerequisites or experience are required
- Apply what you learn about Water Management and Irrigation Design as you use pumps, technology and irrigation components at the COS farm
- Monitor, track and predict water use to maximize food production

It's easy to enroll!
