

“

Our Business Division has an incredible Internship Program that provides students real world experience in their field of study. Students are able to earn college credit for their work, network with professionals in their field, boost their resume and make powerful networking connections while gaining valuable experiences! It's a great opportunity to 'try-out' a potential career.

”

— JANELL SPENCER,  
BUSINESS DIVISION  
CHAIR

Paralegal

### Business & Finance/Marketing, Sales & Service

The mission of the Business Division is to educate and train students for employment in the business world while also meeting the employment needs of our community. A broad range of transfer-level courses are available for students seeking to pursue four-year degrees. Associate of Science degrees are offered in five business areas. Several vocational certificates, requiring from one to four semesters, are available to assist students who are interested in updating business skills or who will enter the job market directly. With the growth in requests by employers for technology-based job skills, the Business Division provides hands-on experience in job-related software and technologies.
