

TILting with AI - Prompting Guide

STEP ONE

Choose an existing assignment prompt

OR

Start from scratch to dream Up a new one with an assist from AI (“I’m bored with my old _____ assignment. Give me 5-6 creative spins on it to refresh the experience for me and my students.”)

STEP TWO

Use a free AI tool to rewrite the prompt through the TILT lens.

Guidance:

- paste it in or summarize it
- specify your students *in detail* (“my students are first-gen CA community college students with limited internet bandwidth and/or off-campus device access.”)
- describe a clear goal (“I want this assignment to be more authentic to real world situations.”)
- indicate anything that *can’t* be changed (“3-4 source citations are required.”)
- indicate an outcome to align to (“students should be demonstrating the ability to...”)
- specific changes you want to see (“create placeholders for me to plug in campus resources like tutorial.”)
- indicate a tone (“make me sound very approachable and supportive.”)
