

STUDENT TRANSPORTATION FEE

The governing board of a community college district may require students to pay the costs of reducing fares for services provided by common carriers or municipally owned transit systems to students and employees.

Additionally, Section 76361.1 of the Education Code allows for this student transportation fee based upon the favorable vote of a majority of the students of the district.

The student transportation fee amount shall be published in the District's Catalog and on the District's web site.

Section 76361.1 requires that student transportation fee contracts with the common carriers or municipally owned transit systems may not be extended beyond a 10-year period without the approval of a majority of the voting students of the District at a publicly noticed election for all students.
