SAMPLE Big Interview Mock Interview Assignment

Objective:

Students will demonstrate the fundamental skills needed for answering the Top 10 Interview Questions.

Directions:

1. You should already be familiar with Big Interview from the previous Module. Go to Big Interview and login.
2. **Now go to "Assignments" and enter Assignment Code: XXXX to access your Mock Interview Assignment.** (There is an option to use Artificial Intelligence (AI) for your recording, but this is not required. However, it is a great way to get feedback in addition to my grading rubric and responses.)
3. This will be a video/remote interview so prior to recording make sure to cover all of the following:
   a. First, check yourself in the mirror to make sure you look professional. Treat this the same as a face to face interview.
   b. Second, look around and check your surroundings and make sure it is neat, orderly, well-lit, and select a professional setting (It can be in your room, just make sure it is facing a wall without distractions, you aren't on your bed or lying down, and nothing may be seen as inappropriate or unprofessional).
   c. Third, make sure all your technology and resources are ready before you get started.
   d. Fourth, make sure you have silenced your cell phone.
   e. Finally, make sure family/roommates know that you are recording so you don't get interruptions while videoing.
4. Utilize the STAR method for your responses and select **SAVE** when you have finalized your response.
5. **Then make sure you select SUBMIT.**

NOTE: If you have any questions, review the Student Guide or message me in Canvas.
